# Scott Chieu

Lawrence, KS 66047 | 785-727-6480 | scottchieu@pm.me | scottchieu.github.io

## EDUCATION

**University of Kansas** Lawrence, KS
Bachelor of Science: Mechanical Engineering Expected Graduation: May 2027
**Relevant Coursework:** Graduate Thermodynamics, Numerical Analysis, System Dynamics

## TECHNICAL EXPERIENCE

**Jayhawk Motorsports – KU Formula SAE Team** Lawrence, KS
Aerodynamics & Electrical Team Member June 2026 – Present

- Designing the 2027 car's accumulator around Molicel P50B cells, along with the precharge circuit, BMS, and IMD integration, targeting a 25% reduction in pack size
- Collaborated with a 52-member team of senior capstone engineers and underclassman volunteers to design the 2027 competition car
- Ran CFD simulations in STAR-CCM+ on 2027 aerodynamic designs, evaluating downforce and L/D and analyzing streamlines to guide design selection
- Instrumented aero devices with pitot tubes and Kiel probes and analyzed on-track data in MoTeC i2, M1 Build, and M1 Tune to validate CFD predictions
- Diagnosed and repaired faults in the 2026 car's high-voltage and low-voltage electrical systems
- Served as race engineer at SCCA Solo Nationals and autocross events, adjusting setup and reviewing run data between runs to diagnose vehicle issues
- Repaired and refined the 2026 car's front wing, rear wing, and sidepods to prepare the vehicle for competition

**Picasso Exotic Aquatics** Lenexa, KS
Mechanical Design Intern June 2025 – Present

- Modeled three custom 700+ gallon aquarium systems in SolidWorks for client projects, including plumbing, stands, sumps, and equipment layouts
- Simulated water flow using SolidWorks Flow Simulation to improve circulation and eliminate dead zones
- Performed stress and strain analysis in Patran on aquarium stands and supporting floors to verify load capacity for 700+ gallon systems
- Designed and fabricated a protein skimmer air-inlet dryer to improve $CO_2$ removal and reduce moisture buildup
- Designed and fabricated mounting systems for Seachem and Neptune Apex dosing systems
- Mocked up aquarium rockwork in Blender to visualize aquascape layouts for clients

Technician December 2023 – August 2024

- Assisted in designing and installing 20+ aquarium systems with SolidWorks and Neptune Apex controllers
- Managed a portfolio of 25+ residential aquarium clients and supervised acclimation of imported aquatic livestock

## Certifications

SOLIDWORKS Design Associate (CSWA), Dassault Systèmes

## SKILLS

**CAD & Modeling:** SolidWorks, Onshape, AutoCAD, Blender
**Simulation & Analysis:** STAR-CCM+ (CFD), SolidWorks Flow Simulation, Patran (FEA), Ansys, MATLAB, Mathcad
**Data Acquisition:** MoTeC i2, M1 Build, M1 Tune; pitot tube and Kiel probe instrumentation
**Hands-on:** Prototype design and fabrication, HV/LV electrical diagnostics, Neptune Apex controllers
**Programming:** Python, HTML, JavaScript
